**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

## ENVIRONMENTAL ASSESSMENT ACT

**O. Reg. 563/90.**
Exemption—The Regional Municipality of Hamilton-Wentworth—HW-RG-01.
Made—August 28th, 1990.

Filed—October 2nd, 1990.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—THE REGIONAL MUNICIPALITY OF HAMILTON-WENTWORTH—HW-RG-01

Having received a request from The Regional Municipality of Hamilton-Wentworth that an undertaking, namely:

> The construction, operation and maintenance of the Mohawk/Golflinks Interchange section of the Mountain East-West and North-South Transportation Corridor Project, as revised by the Regional Municipality,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by The Regional Municipality of Hamilton-Wentworth that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The implementation of the Mountain East-West and North-South Transportation Corridor Project, approved by Joint Board decision, October 24, 1985, will be impeded at an increase in cost to the taxpayers, resulting in both injury and interference.

B. A delay in the implementation of the project will result in the Meadowlands Community development in Ancaster incurring a greater cost or delay resulting in injury and interference.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. The Mountain East-West and North-South Transportation Corridor Project received the scrutiny of the full application of the Act and received approval and subsequent endorsement of Provincial Cabinet. The change now proposed is minor in relation to the scope of the project and will not change the original intent or function of the project.

B. At an initial public meeting, two major concerns were raised in regard to the approved interchange configuration; the ability of the interchange to provide adequate traffic serviceability for the proposed Meadowlands Community and the impact on the access to the Free Reformed Church of Hamilton. As a result of this meeting, an alternative configuration was designed to address these concerns by maintaining the present access to the church and reducing the property required. This alternative received positive support from nine of the eleven affected landowners.

C. The revised alignment received Regional Council endorsement on July 29, 1988. The secondary plan for the Meadowlands Community surrounding this section accommodates this alignment.

This exemption is subject to the following terms and conditions:

1. Except as provided by this Order, the proposed change remains subject to the conditions outlined within the Joint Board decision, rendered October 24, 1985, approving the Mountain East-West and North-South Transportation Corridor Project.

2. Along with the Mohawk/Golflinks interchange, the proponent has identified several other possible changes. Any further changes to the project as approved by the Joint Board on October 24, 1985 are subject to the *Environmental Assessment Act*. Such changes are to be submitted to the Minister

of the Environment as a single package of amendments for review by Ministry staff.

JAMES BRADLEY

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

## Workers' Compensation Board
## Commission des accidents du travail

IN THE MATTER OF Section 86p of the
**Workers' Compensation Act**,
R.S.O., 1980, c. 539, as amended:

**AND IN THE MATTER OF** the findings of the Industrial Disease Standards Panel Report to the Workers' Compensation Board on the Ontario Uranium Mining Industry

In accordance with Section 86p(14) of the Workers' Compensation Act, the Board is publishing this interim notice of its acceptance or rejection of the findings of the Industrial Disease Standards Panel (IDSP), with reasons therefor.

On February 17, 1986, the Workers' Compensation Board requested that the IDSP review the Board's guidelines for adjudicating cases of lung cancer attributable to radon and radon daughter exposure (now termed "radon progeny"). The IDSP commissioned a study to be conducted by a Special Panel, chaired by Dr. Harry Shannon of McMaster University. On April 1, 1989, the Board received the IDSP's Report to the Workers' Compensation Board on the Ontario Uranium Mining Industry with the Special Panel's report appended. The IDSP report consists of two findings, two eligibility rules, and one recommendation. An additional eligibility rule was proposed by three members of the Panel as a Statement of Dissent.

Pursuant to Section 86p(11) of the Workers' Compensation Act, the Board published the Panel report in The Ontario Gazette. The deadline for submissions was August 6, 1989. Three submissions and three letters of clarification were received by the Board, and these are available upon request.

Many perplexing issues were raised in submissions to the Board and by Board staff. For that reason, an Expert Panel was assembled to assist the Board in its review of the IDSP report and to clarify some of these issues. The Expert Panel members have considerable expertise regarding issues of radiation, and uranium mining studies. They were Dr. Geoffrey Howe, Director of the Epidemiology Unit of the National Cancer Institute of Canada, Dr. Duncan Thomas, Biostatistician in the Department of Preventive Medicine in the University of Southern California, and Dr. Anthony James, Senior Scientist at Batelle Pacific Northwest Laboratories in Richland, Washington.

The Report of the Expert Panel appears in the Appendix to this notice.

The Expert Panel evaluated the models used by the IDSP and provided recommendations for improvement. The Expert Panel recommended that a model for the probability of causation (PC) of lung cancer from employment in a dusty job in an Ontario uranium mine should be used to estimate the specific Probability of Causation for any individual miner which may be of use in determining entitlement.

The Expert Panel also concluded that the final model used as described above should assume a multiplicative relationship between smoking and uranium mining.

Board staff have been in contact with Dr. Howe regarding clarification of certain points in the Expert Panel's report. Also, the Expert Panel recommended further analysis be conducted and Board staff are investigating the feasibility of pursuing the additional analysis.

The following comments are the Board's interim response to the Findings, Eligibility Rules and Recommendations of the IDSP contained in the Report to the Workers' Compensation Board on the Ontario Uranium Mining Industry:

**Finding 1:**

**The Panel confirms the existence of a significant excess of mortality from cancer of the trachea, bronchus and lung among Ontario uranium miners in the dusty uranium jobs that are defined by WCB occupation codes 11-16, 21, 22, 25, 26 and 97.**

The Board agrees with this finding and would go further as suggested by one of the submittors to the Board, and say that research indicates that there is a causal relationship between uranium mining in Ontario and the development of primary cancer of the trachea, bronchus and lung.

**Finding 2:**

**At this time, the Panel does not find a probable connection between any other cancers and occupational groups within the Ontario uranium mining industry.**

The Board accepts this finding but is continuing to investigate this issue. The Ministry of Labour has been examining this issue as part of its continuing analysis of mining data from the Mining Master File, and a final report will be completed in the near future. The Board will reserve final comment until the latest data from the Ministry of Labour are reviewed.

**Eligibility Rule 1:**

**That claims arising from cancers of the trachea, bronchus and lung among Ontario uranium miners in dusty occupations (WCB occupation codes 11-16, 21, 22, 25, 26 and 97) and meeting the following criteria be compensated:**

1. **Proof of work in a dusty Ontario uranium mine;**

2. **Medical evidence of a primary cancer of the trachea, bronchus or lung;**

3. **Latency period of at least 10 years (between first employment in a "dusty" occupation in a uranium mine and the diagnosis of a primary lung cancer);**

4. **Sufficient occupational exposure defined as a cumulative exposure to radon and its progeny of at least 40 WLM.**

The Board agrees with the first two points in Eligibility Rule 1.

Regarding point 3 on latency, the IDSP have recommended that the Board retain its current criterion of 10 years, however, the Expert Panel noted that due to the very small number of lung cancer deaths expected in the Ontario cohort during the first 15 years of follow-up, the study may not have been able to detect an increased risk in the 5 to 9 years since first exposure category, even if one existed.

Much of the scientific information on exposure to radon daughters by uranium miners has been accumulated by the Committee on the Biological Effects of Ionizing Radiation (known as the BEIR Committee). This Committee has been studying the health effects of ionizing radiation since the early 1970s.

The BEIR Committee's fourth Report[1] analyzed data from four uranium mining studies and estimated the risk of disease at varying levels of exposure in combination with a number of factors. The Ontario uranium mining cohort was included in this analysis and was the largest of the studies considered by BEIR IV.

---

[1] Committee on the Biological Effects of Ionizing Radiations, Board on Radiation Effects Research Commission on Life Sciences, National Research Council, Health Risks of Radon and Other Internally Deposited Alpha-emitters, BEIR IV, National Academy Press, 1988.

The BEIR IV Report is based upon more substantial evidence from the combination of the Ontario uranium miners cohort with three other cohorts, and determined that an excess risk of lung cancer was observed in the 5 to 9 years since first exposure period. Therefore, the Expert Panel believes that the Board should consider the results of the BEIR IV Committee when determining appropriate latency periods.

Given the limitations of the Ontario data and the BEIR Committee analysis the Board does recognize that there may be circumstances where latency periods of 5 to 9 years would be consistent with radon progeny induced lung cancer. Indeed, the Board has compensated workers with less than 10 years latency where the worker was exposed to radon and radon progeny at very high levels. Also, the planned re-analysis of the Ontario cohort would include more recent data and this may also shed more light on this issue.

Point 4 in this Eligibility Rule indicates that exposure to radon and radon progeny of at least 40 WLM would be sufficient exposure for entitlement to benefits if the other criteria are met as well.

The Board agrees that workers with at least 40 WLM of exposure, who also meet the other criteria (e.g. disease condition, latency factors, etc.) should be entitled to compensation. However, like the IDSP, the Board believes there are some circumstances in which miners with fewer than 40 WLM may be eligible for benefits.

**Eligibility Rule 2 (for Cumulative Exposure of 20-40 WLM)**

**That claims arising from cancer of the trachea, bronchus and lung among Ontario uranium miners in dusty occupations (WCB occupation codes 11-16, 21, 22, 25, 26 and 97) meeting criteria 1, 2 and 3 in Eligibility Rule 1 above be compensated if they meet one of the following criteria:**

1. **Total WLM exposure in the time period 10 to 14 years (i.e. a 5 year period) period prior to diagnosis of the primary cancer is at least 20 WLM:**

   **or**

2. **Total WLM exposure in the time period 10 to 14 years (i.e. a 5 year period) prior to diagnosis of the primary cancer plus 0.5 (or 50%) of the WLM exposure in the time period 15 or more years prior to the diagnosis of the primary cancer is at least 20 WLM.**

The Expert Panel believed that the models in the IDSP report could be improved upon and recommended additional analysis including:

- considering gold mining experience and uranium mining experience in one model,

- using the latency period and the age coefficients developed in the BEIR IV Report, and

- in addition to fitting a model with additive effects of gold mining and uranium mining, fit a model which assumes multiplicative effects of the two kinds of mining experience and see which one fits the data best.

The Board agrees that the combined effect of gold and uranium mining should be investigated further. In view of the fact that the Ministry of Labour now has additional data on miners based on a longer follow-up period, the Board will be asking the Ministry of Labour to perform this analysis in consultation with the Expert Panel. It is anticipated that this model will assist the Board in further evaluating the IDSP's eligibility rule 2.

**IDSP Recommendation**

**In adjudicating any claim for compensation for cancers of the trachea, bronchus and lung among Ontario gold or uranium miners, that the Board take full cogniscence of the following considerations:**

1. **The range of additional evidence identified by the Panel in its criteria of case evaluation (section 4.0, Report on the Ontario Gold Mining Industry, IDSP Report No. 1, April, 1987).**

2. **The many inaccuracies whose presence is acknowledged in the available estimates of any individual uranium miner's radiation exposures as a result of:**

   - **The use of radiation readings based on area sampling rather than individual records;**

   - **The absence of records on known exposures to other radiation types such as gamma and thorium;**

   - **The fact that no records on radiation exposures in either surface or mill work are kept;**

**The fact of exposure to other unidentified carcinogenic substances for uranium miners with prior gold mining experience (in the Panel's Gold Mining Report, possible carcinogens included radon, silica, and arsenic).**

3. **The provisions stipulated in Section 3(4) of the Ontario Workers' Compensation Act when weighing all of the above items of evidence.**

The Board agrees that there are difficulties and inconsistencies in both the measurement and recording of exposures to potential carcinogens in uranium mines.

Concerns regarding the inconsistency of WLM measurements were raised in the Statement of Dissent in the IDSP report and in submissions to the Board. The Expert Panel agrees that this is, indeed, a problem, but that the measurements may be adequate for representation of group exposures in estimating dose-response relationships. However, the Expert Panel did not believe that these measurements were accurate enough to represent an individual's personal exposure on their own.

Therefore, the Expert Panel recommended that each individual's exposure be assessed independent of his "recorded" exposure and a "best estimate" of exposure be used to calculate the individual probability of causation (PC). This individual exposure assessment should take into account the particular occupation(s) of the miner and other sources of relevant radiation exposure.

The Board is considering this approach and will conduct a review to determine the particular situations which would assist a decision-maker in further estimating a miner's exposure to radiation.

Comments, briefs and submissions on the issues raised in this notice are requested, and must be received by the WCB within 60 days of the date of this notice. All comments, briefs and submissions related to this interim response to the IDSP Report on the Ontario Uranium Mining Industry should be addressed to:

After consideration of any comments received and the additional analysis of the updated Ontario uranium miner cohort is completed a final response of the Workers' Compensation Board to the IDSP Report on the Ontario Uranium Mining Industry will be published in accordance with section 86p of the Workers' Compensation Act.

## 1. INTRODUCTION AND BACKGROUND

The Expert Panel was convened by the Ontario Workers' Compensation Board (WCB) to review the report of the Industrial Disease Standards Panel on the Ontario Uranium Mining Industry. The latter report, subsequently referred to as the IDSP Report, consists of three major components. The first of these is a report by a Special Panel on the statistical analysis of data from the epidemiologic study of Ontario miners conducted by Mueller et al. This is subsequently referred to as the Special Panel report. The other two components of the IDSP Report both relate to recommendations for compensation rules for Ontario uranium miners. They consist of a report subscribed to by a majority of the IDSP, and a report, which comes to somewhat different conclusions submitted by three dissenting members of the IDS Panel. These are subsequently referred to as the majority and minority reports respectively. The review panel met in Toronto on April 18, 1990, and the present report presents the findings of that review process.

## 2. OBJECTIVES OF THE REVIEW

The review panel accepted without qualification the following conclusions of the IDSP Report:

2.1 There is almost certainly a causal association between working in a dusty occupation in an Ontario uranium mine, and increased risk of lung cancer.

2.2 There is no substantive evidence to support a causal relationship between such occupations and increased risk of any other cancer.

2.3 The first two criteria of eligibility for compensation proposed in the IDSP Report (i.e. proof of employment and medical evidence of a primary tumour of the trachea, bronchus, or lung) are scientifically appropriate.

In view of these conclusions, the review panel agreed that the primary objective of the review of the IDSP Report was to assess the scientific validity of the principles and empirical data on which the other proposed eligibility rules are based, i.e. those relating to latency, and exposure requirements. In this context, the review panel considered that it is critical to specifically delineate the quantitative model for the probability of causation (PC) which forms the essential scientific underpinning for determing degree of work-relatedness. Derivation of the PC model comes directly from specification of the appropriate risk model, i.e. the quantitative relationship between exposure to radon decay products (RDP) and risk of lung cancer.

Thus, the present report focuses on the development of the appropriate risk model, and the way in which it should be used to provide a scientific basis for establishing eligibility rules. In this context, the first task was to review the epidemiologic study of Ontario uranium miners and the analysis of that study presented in the special panel report, and the results of this review are presented in Section 3. The broader issues relating to specific

compensation rules, particularly those raised in the majority and minority reports, are then discussed in detail in Section 4. Section 5 contains a summary of the major conclusions and recommendations of the review panel.

## 3. REVIEW OF THE EPIDEMIOLOGIC STUDY OF ONTARIO URANIUM MINERS AND THE SPECIAL PANEL REPORT

Given the objectives defined in Section 2 above, the Expert Panel focussed on two specific aspects of the Ontario miners' study and the statistical analysis presented in the special panel report. The first relates to the assessment of any potential biases in the design, execution, and analysis of the study, and the second to the choice of the most appropriate risk model to be derived from the study data.

Bias arises when there is some systematic error occurring in a study which leads to a consistent over- or underestimation of risk, no matter how large the study is. This is obviously critical in the present context, since such a systematic error in risk estimation causes a corresponding systematic error in the estimation of the probability of causation. Biases in epidemiologic studies can be classified as selection, information, or confounding biases. For the Ontario uranium miners' study, possible selection biases relate to the selection of the miners' cohort, the methods of follow-up used, and the selection of the comparison group, i.e. the Ontario population. These are considered in Section 3.1. Information bias could arise from misclassification of lung cancer as the underlying cause of death (3.2) or from measurement error in ascribing RDP exposure to individuals in the cohort

(Section 3.3). Confounding of results is introduced by some factor which is related both to exposure and lung cancer risk. Potential confounders are considered in Section 3.4.

The second important consideration in assessing the Ontario uranium miners' study is the choice of the most appropriate exposure risk relationship. This depends not only on statistical considerations in the data themselves, but also biological considerations, evidence from other epidemiologic studies, and the ultimate use of the risk model in the decision-making process for compensation. Choice of the most appropriate model is considered in detail in Section 3.5.

3.1 **Selection biases:** The definition of the study cohort used in the special panel report differs slightly from that used by Muller in his original analysis. It is not possible to tell from the special panel report, which definition is preferable, but there seems likely to be only a small difference between the two approaches, and the definition used in the Special Panel report seems appropriate in terms of having no obvious bias. In terms of follow-up, the computerized record linkage to the Canadian National Mortality Data Base appears likely to have had an accuracy in excess of 90 percent. Thus, any underestimation of absolute risks or risk differences is likely to be negligibly small. More importantly, there is no reason to suppose that errors in follow-up would be correlated with exposure, and therefore relative risk estimates should be unbiased. The use of the Ontario population as a control group also appears to be appropriate. Any healthy worker effect will

be minimized by eliminating the first five years of follow-up, and the healthy worker effect is less marked for cancers than for other causes of death. In addition, the use of a non-zero intercept in the regression models used for analysis allows for any systematic difference in the underlying lung cancer rates between the cohort and the population on the assumption that such an effect is independent of exposure to RDP. In summary, it seems likely that any selection biases operating in the Ontario uranium miners' study are negligible.

3.2 **Misclassification of cause of death:** Clearly it is possible for the underlying cause of death to be incorrectly coded on death certificates. For lung cancer, such misclassification is generally accepted as likely to be small. If misclassification has occurred, then absolute risks and risk differences will be biased. However, if such misclassification is unrelated to exposure, any effect on relative risk estimates is likely to be minimal. It is not implausible that physicians' diagnoses of lung cancer could be related to their knowledge of miners' work history, but there is no evidence regarding this. Therefore, it appears unlikely that any substantial bias due to misclassification of cause of death will have occurred in the relative risk estimates.

3.3 **Measurement error in RDP exposure:** Two issues arise in the exposure assessment: bias and variability. (1) Are the "standard doses" used in the epidemiologic analysis the best estimate of the average dose of the individuals, and if not, does it matter if the same set of doses are used in computing individuals' probabilities of causation? And (2) what

are the implications of uncertainty in the dose estimates for the fitted dose-response relationships and PC estimates? It appears that the "best" estimate of exposure is provided by the standard doses (Dr. J. Muller, personal communication). An audit of Muller's estimates of exposure, that was carried out by the Atomic Energy Control Board (AECB), led them to conclude that Muller's standard doses are the best available estimates of the collective exposures for groups of miners, and that the special doses always overestimate group exposure (Dr. P. Duport, personal communication). Even if there is some systematic bias in the standard estimates, the assumption of proportionality (i.e. true dose is directly proportional to the standard dose) is not unreasonable. Therefore, the review panel accepted that statistical analysis should be based on the standard dose estimates.

With regard to the second issue (i.e. variability), neither the IDSP Report nor any previous analyses of radon-exposed cohorts have considered the influence of uncertainties in the dose estimates in any quantitative way. The usual observation that nondifferential measurement errors tend to dilute the slope of a dose-response relationship has been often noted, and is echoed in the IDSP Report, but the magnitude of the effect has never been quantified. It should be noted, however, that this dilution effect strictly applies only under a "classical errors" model, in which the estimated doses are randomly distributed around the true doses. A more appropriate model in this and many occupation studies is the "Berkson error" model, in which the individuals' true doses are randomly distributed around the measured

location/year means.[1] For this model, it can be shown that the estimated slope is a consistent estimator of the true slope. (The real situation is probably a complex mixture of the two models, as the average doses are themselves measured with error.)

Methods have recently been developed to allow one to adjust estimates of dose-response relationships and their standard errors for uncertainty in dosimetry. Although such methods could, in principle, be applied to these data, the review panel feels that they are so complex and not well enough established in the literature to warrant the effort. Instead, the review panel recommends that consideration of dose errors be limited to their influence on individual PC estimates, where they will have a much larger effect than on the slope estimates. This issue is discussed further below.

3.4 **Confounding:** The obvious major potential confounder of the association between RDP exposure and lung cancer risk is smoking. Smoking is, of course, a very strong risk factor for lung cancer, and if smoking habits among miners differed by exposure status, this clearly would impinge upon the relative risk estimates. The evidence provided by the case-control study conducted within the cohort provides some reassurance that such confounding has not produced any major bias in the risk estimates, and similar data have been provided by other uranium miners' studies. It should be noted that differences in smoking habits between miners as a whole and the general population would be taken into account by use of a non-zero intercept in the risk models as discussed above.

Thus, although the evidence cannot be conclusive in view of the absence of smoking information on the cohort as a whole, the Expert Panel concluded that smoking does not appear likely to have introduced any substantial bias in the risk estimates from RDP exposure.

3.5 **Choice of appropriate statistical model:** Poisson regression methods, similar to those used in the BEIR IV[(2)] report, were used to fit various models to the Ontario uranium miner data (Special Panel Report). The basic approach is quite appropriate, but the particular models considered could have been improved. It is unlikely that this will lead to any major changes in the resulting risk estimates, but they should be more defensible.

Two approaches were taken to the fitting: separate analysis of the GOLD and NOGOLD cohorts (with adjustments for gold mining in the former) and a combined analysis of the two cohorts with simultaneous estimation of gold and uranium mining effects. The Expert Panel feels strongly that the latter approach is the more appropriate for two reasons. First, the method of adjusting for gold mining in the former approach is incorrect, as a model for gold mining is derived first, ignoring uranium mining effects, and the coefficients are then fixed in the second stage. Because the first stage model is not controlled for the effects of uranium mining, it is probably biased and the estimates of the second stage model are therefore not correctly adjusted for gold mining. Simultaneous estimation of the two sets of coefficients is therefore needed here as well. Second, to best estimate the total

occupational contribution to the risk of developing lung cancer, the Expert Panel recommends that a model for the joint effects of both gold and uranium mining be developed. This is done in Table 29 (Special Panel Report), but the choice of models in this table is too limited. The Expert Panel therefore recommends that further analyses focus on the combined cohort, with simultaneous estimation of both gold and uranium mining effects. Separate analyses of the various subcohorts are of course worth reporting to support the main results, but from the results reported so far, there do not appear to be any major differences in radon effects between the subcohorts.

The Expert Panel recognizes that there may be important differences in dosimetry, confounding and modifying factors, or methodology that would influence the magnitude of the slope estimates. For this reason, it is entirely appropriate to use estimates derived from the Ontario experience to assess the risk of lung cancer in Ontario uranium miners. On the other hand, it is much less likely that populations would differ substantially in terms of biologically-determined modifying factors like age and latency. The results from the Special Panel Report analysis differ from the conclusions of the BEIR IV Report on both of these factors. The review panel feels that the conclusions of the BEIR IV Report are based on much stronger data. The Expert Panel therefore recommends that the modifying effects of age and latency be constrained to the BEIR IV estimates, leaving only the slope coefficient (and intercept and gold mining effects) as free parameters.

Although a general mixture model for the joint effects of gold and uranium mining is proposed in the Special Panel Report, only additive models are considered in Table 29 (and only multiplicative models in Table 24). In the description of Table 29, it is stated that the general mixture model did not improve the fit, but the Expert Panel feels that the multiplicative model should also be considered. If the gold mining effect is entirely attributable to unmeasured radon exposures, then an additive model is natural, but if it is due to some other exposures acting by a different mechanism, then a multiplicative model might fit better. (Certainly, if a probability of causation model for uranium mining were desired, a multiplicative model would be simpler, as one could then ignore the contribution of gold mining, although the review panel recommends below that a combined model be developed.) It is therefore recommended that Table 29 be expanded to include multiplicative models. Depending on the results, the general mixture model might also be considered as a way of illustrating the range of alternatives that would be consistent with the data, but this is of lower priority.

The models used for adjusting for gold mining seem inappropriate. A linear effect of DST (an index of exposure to dust in gold mines) is reasonable, but the effects of YFEP (calendar year of first exposure) and TFE (time since first exposure in years) should be treated as modifiers of the DST effect, not main effects. Furthermore, they should be modeled in such a way that their effect cannot become negative. A convenient way to accomplish this is to treat them as a log-linear

modifier of the DST effect,

i.e. $$SMR = b_0 [1 + b_1 \, DST \exp(b_3 YFEP + b_4 TFE + \ldots) ]$$

Note that in this equation, the intercept has been taken outside of the square brackets. This allows the risk coefficients to be more easily interpreted on a relative risk scale and used for PC calculations. This convention should be adopted in all risk modeling.

In conclusion, it is recommended that the following general class of models be considered:

additive: $$SMR = b_0[1 + b_1 \, DST \exp(b_2 YFEP + b_3 TFE + \ldots) + c1 \, (w_2 + 0.5 \, w_3) \exp (c_2^B A_1 + c_3^B A_2)]$$

multiplicative: $$SMR = b_0[1 + b_1 \, DST \exp(b_2 YFEP + b_3 TFE + \ldots)] [ c_1 \, (w_2 + 0.5 \, w_3) \exp (c_2^B A_1 + c_3^B A_2)]$$

where $b_0$, $b_1$, $b_2$, $b_3$, and $c_1$ are coefficients to be estimated from the Ontario data

$c_2^B$ and $c_3^B$ are fixed to be the coefficients from the BEIR IV analysis

$A_1$ and $A_2$ are dummy variables for the three age groups.

Although models of this form can be fitted with GLIM, it is not entirely straight-forward. The AMFIT program used by the BEIR IV and V Committees can fit such models very simply and might be considered as an alternative.

## 4. ISSUES RELATING TO ELIGIBILITY RULES

Following the assessment of the epidemiologic study of Ontario uranium miners, the Expert Panel then considered a number of issues relating to the recommended eligibility rules, some of the issues were also raised by the majority and minority reports: as discussed in Section 2, the focus is on the identification of the appropriate quantitative model for the probability of causation, and the way in which that model should be used in the assessment of the occupational contribution to an individual's lung cancer risk. A number of issues were identified, each of which is now considered.

4.1 **Uncertainties in individual exposure estimates:** A major point of contention in the minority report is the influence of uncertainty in individual exposure estimates on the PCs. It is argued that these uncertainties are so large that virtually any miner could have plausibly received doses that would lead to excess risks. The Expert Panel recognizes that the uncertainties are quite large for the early exposures, but feels that as both the average levels and the uncertainties have declined over time, the same argument does not apply for more recent exposures. A recent analysis of the sources of uncertainty in estimates of WLM exposures for Ontario uranium miners (and other study groups) carried out for the AECB by Senes Consulting Ltd.,[3] provides useful guidance on the factors to be considered in estimating the past exposure of an individual miner.

The minority report also expresses concern that individuals will

not be assessed unless they are close to the level of exposure required for compensation. The review panel agreed with this concern, and therefore recommended that for all claimants the best estimate of each individual's exposure should be derived using not only the recorded exposures, but also supplementary information on factors such as the specific occupation and any other relevant considerations. It must be emphasized that uncertainties in individual exposure estimates have a much more important influence upon an individual's PC than upon the relative risk models, which are based on grouped data and hence less affected by such uncertainties.

4.2 **Exposure to thoron and low-LET radiation:** The majority report considered that such exposures were adequately dealt with by utilizing exposure data on RDP and risk models based on the RDP exposure. This will be true if exposure to thoron and low-LET radiation is directly proportional to exposure to RDP, and if the ratio of the two is constant for all mines and for all times. If, however, there is some indication that some mines, or some exposure periods, have substantially different relative proportions of thoron and low-LET exposure (as stated in the minority report), this should be taken into account in ascertaining an individual's total exposure. An approximate way of doing this would be to identify those mines or time periods where exposures to non-RDP radiation might be expected to be higher, and to take account of this in ascribing the total exposure of any individual. However, if data are not available which discriminate among mines or time periods, then PCs should be based purely upon the RDP exposure, as suggested by the

majority report.

4.3 **Joint effect of RDP exposure and smoking:** The most important determinant of lung cancer risk is smoking status. As discussed above, (Section 3.4) smoking appears unlikely to have confounded the risk estimates for RDP exposure in the Ontario data. However, in order to derive the appropriate model for the probability of causation, it is necessary to specify the nature of the interaction between smoking and RDP exposure in increasing lung cancer risk. Available data on the joint effect of smoking and RDP exposure are not extensive. Two probability models are commonly considered, namely the additive and multiplicative models. The Expert Panel agreed with the conclusion of the BEIR IV Committee, namely, that the data to date are more supportive of a multiplicative than an additive model. It is therefore concluded that for purposes of deriving a PC model, the assumption of multiplicativity be made. This implies that the probability of causation from RDP exposure for any individual is independent of his smoking status. Data on the interaction between RDP exposure and risk factors for lung cancer other than smoking are not available (with the exception of gold mining experience, as discussed below), and therefore such factors cannot be taken into account in deriving an appropriate PC model.

4.4 **Specific eligibility criteria proposed by the majority report:** The majority report proposes two distinct criteria for eligibility, based upon exposure estimates. The first is simply a total exposure of at

least 40 WLM, and the second gives recognition to the increased risk associated with exposure 10-14 years before the occurrence of lung cancer. The Expert Panel thought it scientifically inappropriate to have two such criteria. The first criterion ignores the time dependency in the risk function which is seen clearly in both the Ontario data, and in the combined analysis presented by the BEIR IV Committee. The second criterion recognizes such time dependency, but appears to take it into account in a rather arbitrary fashion. The two approaches can be inconsistent. For example, if an individual claimant had accumulated 36 WLM in the 10 years prior to the development of lung cancer, and 4 WLM in the 11th year, he would be eligible under the first criterion. Yet, according to the second model, the only exposure relevant to risk is the 4 WLM in the 11th year, and clearly, under this model, the probability of causation would be extremely small. Therefore the Expert Panel felt there should be a single eligibility criterion, and that its scientific basis should be the specific quantitative time dependent model derived from the most appropriate analysis of the Ontario data as described in Section 3.5. This would avoid the inconsistencies of the approach proposed in the majority report.

4.5 **Latency:** The majority report proposes a minimal latency of 10 years between first employment and occurrence of lung cancer in its eligibility rule, based on the analysis of the Ontario uranium miners' study. However, the Expert Panel felt that the Ontario study had little information concerning latency in view of the very small number of lung cancer deaths expected in the cohort during the first 15 years of

follow-up. The latency identified in the BEIR IV Report, i.e. 5 years, is based upon more substantial evidence from the combination of the Ontario uranium miners' study with three other studies, and therefore on scientific grounds seems a much more appropriate choice for latency. It is most unlikely that any effect from RDP exposure on lung cancer risk could manifest itself in less than five years from first exposure.

4.6 **Previous gold mining experience:** Since a substantial proportion of Ontario uranium miners also have gold mining experience, the question of joint exposure from both occupations in relation to risk of lung cancer is obviously important. An important question is whether the interaction between risk from uranium mining and risk from gold mining is multiplicative or additive. This question can be addressed directly in the analysis of the Ontario uranium miners' cohort. The final preferred model in the Special Panel Report (Table 29) is an additive model, but since the corresponding multiplicative model is not presented, it is not possible to determine which of the two approaches offers the better fit to the data. Ideally, a model for estimating lung cancer risk for both gold mining and uranium mining would be derived from a statistical analysis of the data for all miners in Ontario with either gold mining experience and/or uranium mining experience. However, even in the absence of such an analysis, the two corresponding PCs should be combined in an appropriate fashion. The PC model for uranium mining should be derived as discussed in this report from the entire cohort of uranium miners, and a PC model for gold mining should be derived from whatever data are currently available. The decision as

to whether the effects are multiplicative or additive would then be based upon the analyses of the entire uranium miners' cohort described in the Special Panel Report. The probability of causation for joint exposure to gold mining and uranium mining $p_{gu}$ will be given by:

$$p_{gu} = \frac{RR_{gu} - 1}{RR_{gu}}$$

where RR is the risk relative to an individual with neither gold nor uranium mining experience. If the risks from gold and uranium mining act multiplicatively, then:

$$RR_{gu} = RR_g \times RR_u$$

If they act additively, then:

$$RR_{gu} = 1 + RR_g - 1 + RR_u - 1$$

where $RR_g$ is the relative risk from gold mining and $RR_u$ is the relative risk from uranium mining.

4.7 **Combined latencies for uranium and gold mining:** The minority report raises the issue of individuals who have both uranium and gold mining experience and do develop lung cancer before the minimal latency period for both industries as defined by the respective policies. If the risk for both occupations resulted from the same exposure, i.e RDP, then clearly the latencies for both occupations should be identical. Currently the gold mining latency period is 15 years, and as discussed above, the Expert Panel believes that the most appropriate scientific choice for latency is 5 years for uranium mining. These different latency periods imply that the causal factor is likely to be different for the two occupations. Only if exposure in one industry affected the

latency period for the other industry would it be necessary to consider the concept of a "joint latency". In the absence of such information, the logical procedure is to require fulfillment of the latency requirement of at least one of the industries, i.e. to follow the current practice. Therefore, the review panel did not support the contention of the minority report in this respect.

## 5. SUMMARY AND RECOMMENDATIONS

The review panel agreed with a number of the conclusions presented in the IDSP Report. There clearly is an association between employment in a dusty occupation in an Ontario uranium mine, and increased risk of lung cancer, and this association is almost certainly causal. There is also a lack of evidence to substantiate any association with increased risk of any other cancer. The first two criteria for eligibility proposed by the IDSP Report, namely proof of occupation and proof of disease, are appropriate. The design and execution of the epidemiologic study of Ontario uranium miners are unlikely to have led to any substantial biases in the relative risk estimates, and therefore these data potentially are the most appropriate source for estimating the effect upon risk of exposure to radon decay products in Ontario uranium mines.

However, the Expert Panel did not agree with some aspects of the IDSP Report. The statistical analysis presented in the Special Panel Report needs to be supplemented by some further modeling as discussed in detail in Section

3.5. The two alternative eligability rules relating to exposure proposed by the majority report could be inconsistent, and should be reconsidered after the reanalysis of data and the most appropriate single model for the probability of causation is developed. The minimal latency period requirement should be based on the stronger evidence provided by the BEIR IV in which a 5 year latency was accepted. The uncertainty in individual exposure estimates could have a substantial impact upon an individual's probability of causation, but would have much less effect upon the grouped analysis on which the risk estimates are based. Therefore, the Expert Panel agreed with the minority report that each individual's exposure should be assessed irrespective of his individual PC as calculated based on recorded exposure. This assessment should take account of the particular occupation in which the claimant was working, and also if possible any experience in mines or at periods when the contribution of radiation from sources other than RDP might be greater than the average. The review panel also felt that joint exposure in gold and uranium mining requires further analysis of the data, and the derivation of a probability of causation model which correctly takes into account the effects of such joint exposure.

In view of these conclusions, the review panel makes the following specific recommendations:

5.1 A specific model for the probability of causation of lung cancer from employment in a dusty job in an Ontario uranium mine should be developed. This model should be used to estimate the specific PC for any individual miner, and should provide the best scientific evidence

to determine eligibility.

5.2 The above model should assume a multiplicative relationship between RDP exposure and other risk factors for lung cancer (with the possible exception of gold mining experience), and thus an individual's PC depends only on his uranium mining experience and not, for example, on his smoking status.

5.3 The relative risk model from which the PC model is derived in the usual way will be of the form:

$$\text{Relative Risk} = 1 + c(a)\ (w_2 + 0.5w_3)$$

where $w_2$ is cumulative RDP exposure in the period 5-14 years before occurrence of lung cancer, and $w_3$ is the cumulative exposure 15 or more years prior to that occurrence. The slopes c(a) should be derived from an extended analysis of the Ontario uranium miners' study, and the specific values will depend upon the age at which the lung cancer occurs, using the same parameters as provided in the BEIR IV Report.

5.4 Further statistical analysis of the Ontario uranium miners' study data should be performed. This would focus on the entire cohort and would be used to produce the estimates required for the probability of causation model as discussed in Section 3.5 and recommendation 5.3.

5.5 The minimal latency period between first employment and occurrence of lung cancer should be 5 years based on the best scientific evidence.

5.6 Exposures should be individually assessed irrespective of their probability of causation as derived from recorded exposure values. These assessments should take into account the specific occupation in which the individual was employed, and also, if possible, exposure to other radioactive sources in mines and at times where such exposure was greater than average. This individual assessment should provide the "best" estimate of the RDP exposure for each individual miner which then can be used in the probability of causation model derived as above.

5.7 Further analysis of the joint effects of gold and uranium mining should be conducted in order to provide the most appropriate model for the probability of causation arising from such joint exposure.

## LIMIT ON CAMPAIGN EXPENSES

.01 The Act defines campaign expenses as meaning any expense incurred in relation to an election by or on behalf of a political party, constituency association or candidate registered under the Act during the period commencing with the issue of a writ for an election and terminating on polling day, **other than**:

(a) expenses incurred by a candidate in seeking nomination in accordance with the **Election Act, 1984**,

(b) a candidate's deposit as required under the **Election Act, 1984**,

(c) auditor's and accounting fees,

(d) interest on loans authorized under section 36,

(e) expenses incurred in holding a fund-raising activity referred to in section 24. Refer to Guideline G31.08 regarding restrictions on advertising content,

(f) expenses incurred for victory parties held after the close of polls and thank you advertising published after polling day,

(g) expenses incurred in relation to the administration of the political party or constituency association such as:

(i) employment costs associated with permanent full or part-time staff employed by the party or constituency association,

(ii) costs associated with research,

(iii) costs of polling, and

(iv) certain pre-writ media production costs as referred to in Guideline G25.03,

(h) transfers authorized under section 28,

(i) fees paid in respect to maintaining a credit card facility,

(j) expenses relating to a recount in respect of the election,

(k) child care expenses of a candidate,

(l) payments made to the candidate in lieu of salary lost during an unpaid leave of absence from the candidate's employer, and

(m) the rent associated with maintaining a temporary residence in the electoral district when the candidate does not maintain a residence therein,

but campaign expenses are deemed to include the value of any goods held in inventory or any fees or expenses for services for any candidate or political party, and any contribution of goods and services to the political party, constituency association or candidate registered under the Act, for

use in whole or in part during the period commencing with the issue of the writ for an election and terminating on polling day.

**Act reference 1(1)**

.01a In addition to the exempt campaign expenses listed in paragraph .01 above, the Commission has ruled that expenses which are directly related to a candidate's physical disability (as defined in the Ontario Human Rights Code) also do not constitute campaign expenses. The Human Rights Code defines physical disability as follows:

"any degree of physical disability, infirmity, malformation or disfigurement that is caused by bodily injury, birth defect or illness, and without limiting the generality of the foregoing including diabetes mellitus, epilepsy, any degree of paralysis, amputation, lack of physical coordination, blindness or visual impediment, deafness or hearing impediment, muteness or speech impediment, or physical reliance on a dog guide or on a wheel chair or other remedial appliance or device".

Thus reasonable expenses over and above those expenses that would have been incurred by those candidates not having any physical disability will be exempt as a campaign expense. For example, a candidate confined to a wheel chair may need special transportation services. A non-physically disadvantaged candidate would have the cost of a car. However, the physically disadvantaged candidate confined to a wheel chair may need a specially equipped mode of transportation. The additional cost of the specially equipped mode of transportation will be exempt as a campaign expense. Other special services such as, a TDD/TTY telephone, the services of a "sign" interpreter or a wheel chair for a candidate with a physical disability will also be exempted as a campaign expense.

**Act reference 1(1)**

All exempt campaign expenses shall be recorded and reported.

.02 Advertisements paid for by any person, corporation or trade-union which promote or oppose a political party or candidate and costing either individually or in aggregate in excess of $100 are considered a contribution to the party or candidate with whose knowledge and consent the political advertising was done and, if done during the relevant period, a campaign expense.

**Act reference 23(1)**

.03 Every payment of a campaign expense shall be made by the CFO of the registered party, constituency association or candidate that incurred the campaign expense. Except where the campaign expense is less than $25, such campaign expense shall be vouched for by a statement setting forth the particulars and proof of payment.

**Act reference 39(7)**

.04 Any monies used for a political campaign by a registered candidate out of the candidate's own funds shall be considered to be a contribution for the purposes of this Act. Every registered candidate shall submit to the candidate's CFO a statement in writing setting forth all campaign expenses paid or to be paid out of the candidate's own funds, together with all receipts and claims therefor within three months after polling day.

**Act reference 19(3)**

.05 Where goods or services have been provided, whether or not considered to be a contribution for the purposes of the Act, an expense in the equivalent value is considered to have been incurred except advertising valued at $100 or less arranged by a person, corporation or trade union with the knowledge and consent of the political party, constituency association or candidate.

**Act references 22(2) and 23(1)**

.06 With the exception of goods held in inventory for any candidate for use during a campaign period, funds, goods or services transferred between a political party, a constituency association and the campaign account of a registered candidate are not considered either a contribution or campaign expense.

**Act reference 28**

.07 No constituency association shall incur campaign expenses greater in total than the amount previously approved in writing by the CFO of the candidate endorsed by that constituency association.

**Act reference 39(5)**

.08 Where total campaign expenses exceed the limitation provided in the Act, the campaign expense subsidy to which a political party may be entitled will be reduced by $1 for every $1 the campaign expenses exceed the maximum allowed.

**Act reference 46(6)**

A similar penalty is provided in relation to the expense subsidy to which a candidate may be entitled.

**Act references 46(1) and 46(2)**

An elected member of the Assembly may incur an even greater penalty. Should the campaign expenses of the member exceed the maximum amount allowed and the Assembly find no mitigating reason for non-compliance, the member shall forthwith vacate the seat.

**Act references 39(4) and 44(2)**

.09 (a) The campaign expenditure of a political party shall not exceed the aggregate amount determined by multiplying 40 cents by:

(i) in relation to a general election, the number of electors entitled to vote, as certified by the Chief Election Officer, in the electoral districts in which there is an official candidate of that party, and

(ii) in relation to a by-election in an electoral district the number of electors entitled to vote, as certified by the Chief Election Officer, in that electoral district.

(b) The joint campaign expenditure limit of a candidate together with that of the candidate's constituency association shall not exceed the amount that is the aggregate of:

(i) $2 for each of the first 15,000 of the number of electors entitled to vote, as certified by the Chief Election Officer, in the candidate's electoral district and $1 for each of the number of such electors in excess of 15,000 but not more than 25,000, and 25 cents for each of the number of electors in excess of 25,000, **and**

(ii) in the case of candidates in the electoral districts of Cochrane North, Rainy River, Kenora, Lake Nipigon, Algoma and Nickel Belt the amount determined above shall be increased by $5,000.

**Act references 39(1), 39(2) and 39(3)**

.10 Following polling day and immediately upon receiving the certified list of electors from the Chief Election Officer, the Commission will notify the CFO of a political party and candidate of the number of electors upon which the expenditure limitation is to be determined.

For budgetary purposes, however, each CFO should obtain the list of electors from the local Returning Officer immediately after the enumeration.

.11 Within three months after polling day invoices for goods or services must be submitted by their suppliers to the CFO of the political party, constituency association, or candidate that incurred the campaign expense. Such invoices or accounts must be retained until authorization to destroy them is obtained in writing from the Commission.

.12 Where a CFO disputes or refuses to pay an account, such account shall be considered to be a disputed claim and the claimant may bring an action for payment. ## RESTRICTIONS IMPOSÉES AUX DÉPENSES LIÉES À LA CAMPAGNE ÉLECTORALE

.01 La loi définit comme suit les dépenses liées à la campagne électorale, les dépenses qu'engage un parti politique, une association de circonscription ou un candidat inscrits aux termes de la loi, ou qui sont engagées pour son compte pendant la période comprise entre l'émission du décret de convocation des électeurs et le jour du scrutin, **à l'exception de ce qui suit** :

a) les dépenses engagées par le candidat lorsqu'il sollicitait une candidature conformément à la **Loi électorale de 1984**;

b) le dépôt remis par le candidat tel que l'exige la **Loi électorale de 1984**;

c) les honoraires de vérification et de comptabilité;

d) les intérêts sur les prêts autorisés aux termes de l'article 36;

e) les dépenses engagées relativement à la tenue d'une activité de financement visée à l'article 24. Voir la Ligne directrice G31.08 touchant les restrictions relatives au contenu de la publicité;

f) les dépenses engagées relativement à la célébration de la victoire après la fermeture des bureaux de vote et à la publication de remerciements après le jour du scrutin;

g) les dépenses engagées relativement à l'administration du parti politique ou de l'association de circonscription, notamment :

(i) les coûts de personnel en rapport avec la rémunération du personnel permanent à temps plein ou à temps partiel au service du parti ou de l'association de circonscription,

(ii) les coûts de recherche,

(iii) les coûts du scrutin,

(iv) certains coûts de production de moyens de diffusion avant l'émission du décret de convocation, dont il est question dans la Ligne directrice G25.03;

h) les transferts autorisés aux termes de l'article 28;

i) les frais occasionnés par l'entretien d'un service de cartes de crédit;

j) les dépenses liées au dépouillement judiciaire relatif à l'élection;

k) les dépenses liées à la garde d'enfants d'un candidat;

l) les paiements versés au candidat en remplacement du salaire perdu pendant un congé sans solde autorisé par son employeur;

m) le loyer lié au séjour dans une résidence temporaire dans la circonscription électorale lorsque le candidat n'y a pas de résidence permanente.

Les dépenses liées à la campagne électorale sont réputées comprendre toutefois la valeur des articles gardés en stock ou des honoraires ou des dépenses liés à des services fournis à un candidat ou à un parti politique, ainsi que la valeur de tout article et tout service fournis au parti politique, à l'association de circonscription ou au candidat inscrits aux termes de la loi qui doivent être utilisés en totalité ou en partie pendant la période comprise entre l'émission du décret de convocation des électeurs et le jour du scrutin.

**Renvoi à la loi 1 (1)**

**.01a** En sus des dépenses liées à la campagne électorale faisant l'objet d'une exception, énoncées au paragraphe .01 ci-dessus, la Commission a décidé que les dépenses qui sont directement reliées à l'incapacité physique d'un candidat selon la définition du Code ontarien des droits de la personne ne constituent pas des dépenses liées à la campagne électorale. Le Code ontarien des droits de la personne définit l'incapacité physique comme suit:

«Tout degré d'incapacité physique, d'infirmité, de malformation ou de défigurement dû à une lésion corporelle, une anomalie congénitale ou une maladie, et notamment, le diabète sucré, l'épilepsie, tout degré de paralysie, une amputation, l'incoordination motrice, la cécité ou une déficience visuelle, la surdité ou une déficience auditive, la mutité ou un trouble de la parole, ou la nécessité de recourir à un chien d'aveugle, à un fauteuil roulant ou à un autre appareil ou dispositif correctif.»

Donc, les dépenses raisonnables dépassant les dépenses qui ont été engagées par les candidats sans incapacité physique feront l'objet d'une exception aux dépenses liées à la campagne électorale. Par exemple, tout candidat qui doit recourir à un fauteuil roulant peut avoir besoin de services de transport spéciaux. Certes un candidat qui n'a pas de handicap physique subirait les dépenses d'une automobile. Cependant, le candidat ayant un handicap physique qui doit recourir à un fauteuil roulant peut avoir besoin d'un mode de transport doté d'un équipement spécial. Le coût supplémentaire du mode de transport doté d'un équipement spécial fera l'objet d'une exception. D'autres services spéciaux, comme le téléphone ATS et le téléimprimeur, les services d'un interprète gestuel ou un fauteuil roulant pour les candidats ayant un handicap physique feront également l'objet d'une exception aux dépenses liées à la campagne électorale.

**Renvoi à la loi 1(1)**

Prière de comptabiliser et de déclarer toutes les dépenses liées à la campagne électorale faisant l'objet d'une exception.

**.02** Les publicités payées par un particulier, une personne morale ou un syndicat qui favorisent un parti politique ou un candidat ou manifestent de l'opposition à un parti politique ou à un candidat et qui coûtent chacune ou globalement plus de 100 $ sont considérées comme une contribution au parti ou au candidat à la connaissance et avec le consentement de qui la publicité politique est faite et, si elle est faite durant la période pertinente, comme une dépense liée à la campagne électorale.

**Renvoi à la loi 23 (1)**

**.03** Le DF du parti inscrit, de l'association de circonscription inscrite ou du candidat inscrit qui a engagé des dépenses liées à la campagne électorale effectue le paiement qui s'y rapporte. Sauf si le montant d'une dépense est inférieur à 25 $, la dépense doit être appuyée d'un relevé détaillé qui inclut la preuve de paiement.

**Renvoi à la loi 39 (7)**

.04 Pour l'application de la loi, sont considérées comme une contribution les sommes prélevées sur le fonds particulier d'un candidat inscrit que celui-ci affecte à sa campagne électorale. Chaque candidat inscrit présente à son DF, dans les trois mois du jour du scrutin, un relevé de toutes les dépenses liées à la campagne électorale qui ont été payées, ou qui le seront, grâce à ces sommes, ainsi que les récépissés et les demandes qui s'y rapportent.

**Renvoi à la loi 19 (3)**

.05 En cas de fourniture de biens ou de services, si l'on considère qu'ils constituent une contribution pour l'application de la loi, on considère qu'une dépense équivalente a été engagée, sauf s'il s'agit d'une publicité évaluée à 100 $ ou moins, commandée par une personne, une personne morale ou un syndicat à la connaissance et avec le consentement du parti politique, de l'association de circonscription ou du candidat.

**Renvois à la loi 22 (2) et 23 (1)**

.06 À l'exception des biens gardés en stock à l'usage d'un candidat au cours d'une période de campagne électorale, les fonds, les biens et les services transférés entre un parti politique, une association de circonscription et le compte de la campagne électorale d'un candidat inscrit ne constituent ni une contribution ni une dépense liée à la campagne électorale.

**Renvoi à la loi 28**

.07 L'association de circonscription ne doit pas engager des dépenses liées à une campagne électorale dont le montant total est supérieur à la somme préalablement approuvée par écrit par le DF du candidat que parraine cette association.

**Renvoi à la loi 39 (5)**

.08 Si la somme totale des dépenses liées à une campagne électorale dépasse le plafond fixé par la loi, la subvention relative aux dépenses liées à une campagne électorale à laquelle le parti politique peut avoir droit sera réduite de un dollar par dollar dépassant le plafond des dépenses liées à une campagne électorale.

**Renvoi à la loi 46 (6)**

Une peine semblable est prévue en ce qui concerne la subvention relative aux dépenses à laquelle un candidat peut avoir droit.

**Renvois à la loi 46 (1) et 46 (2)**

Un député élu à l'Assemblée est passible d'une peine encore plus sévère. Si le montant des dépenses liées à la campagne électorale qu'a engagées le député est supérieur au maximum permis et que l'Assemblée ne trouve aucune circonstance atténuante, le député quitte sans délai son siège à l'Assemblée.

**Renvois à la loi 39 (4) et 44 (2)**

.09 a) Les dépenses liées à la campagne électorale d'un parti politique ne sont pas supérieures au produit obtenu en multipliant 0,40 $ par :

(i) en ce qui concerne une élection générale, le nombre d'électeurs ayant le droit de voter, selon l'attestation du directeur général des élections, dans les circonscriptions électorales où ce parti présente un candidat officiel, et

(ii) en ce qui concerne une élection partielle dans une circonscription électorale, le nombre d'électeurs ayant le droit de voter, selon l'attestation du directeur général des élections, dans cette circonscription.

b) Le plafond des dépenses liées à la campagne électorale engagées par un candidat et réunies à celles qu'engage son association de circonscription n'est pas supérieur au montant qui comprend l'ensemble des éléments suivants :

(i) 2 $ à l'égard de chacun des 15 000 premiers électeurs ayant le droit de voter, selon l'attestation du directeur général des élections, dans la circonscription électorale du candidat; 1 $ à l'égard de chacun des électeurs au-delà des 15 000 premiers, jusqu'à concurrence de 25 000, et 0,25 $ pour chacun des électeurs au-delà des 25 000 premiers, **et**

(ii) la somme fixée ci-dessus est majorée de 5 000 $ dans le cas des candidats des circonscriptions électorales de Cochrane Nord, Rainy River, Kenora, Lake Nipigon, Algoma et Nickel Belt.

**Renvois 39 (1), 39 (2) et 39 (3)**

.10 Après le jour du scrutin et dès réception de la liste certifiée des électeurs communiquée par le directeur général des élections, la Commission informe le DF d'un parti politique et le candidat du nombre d'électeurs à propos duquel les restrictions aux dépenses doivent être déterminées.

Aux fins des prévisions budgétaires, toutefois, chaque DF doit se procurer une liste des électeurs auprès du directeur local du scrutin immédiatement après le recensement.

.11 Dans les trois mois qui suivent le jour du scrutin, les fournisseurs doivent présenter leurs factures de biens et services au DF du parti politique, de l'association de circonscription ou du candidat qui a engagé la dépense liée à la campagne électorale. Il faut garder ces factures ou ces comptes jusqu'à ce qu'on obtienne par écrit de la Commission l'autorisation de les détruire.

.12 Constitue une demande contestée le compte qu'un directeur des finances conteste ou refuse de payer. L'auteur de la demande peut intenter une action en recouvrement de ce paiement. Les particularités des demandes contestées et les motifs qui expliquent le litige doivent être déclarés dans les états financiers vérifiés relativement à la campagne électorale à déposer auprès de la Commission.

**Renvoi à la loi 39 (8)**

# MOTOR VEHICLE TRANSPORT ACT, 1987
# LOI DE 1987 SUR LES TRANSPORTS ROUTIERS

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

# LOI DE 1987 SUR LES TRANSPORTS ROUTIERS

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

## MOTOR VEHICLE TRANSPORT ACT, 1987
## LOI DE 1987 SUR LES TRANSPORTS ROUTIERS

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7 (4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10 (1) of the Truck Transportation Act,

1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

## MOTOR VEHICLE TRANSPORT ACT, 1987
## LOI DE 1987 SUR LES TRANSPORTS ROUTIERS

**INTRA-PROVINCIAL TRUCK APPLICATIONS:**

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7 (4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

**NOTE:** A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10 (1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

## Basic Guidelines for Claiming Ontario Tax Credits

- You must file a completed Individual Income Tax Return along with the Ontario Tax Credit form.
- If you lived with your spouse at year end, one of you must claim the Property and Sales Tax Credits and Home Ownership Savings Plan Tax Credit for both of you. However, the Political Contribution Tax Credit can be claimed by either spouse. If you lived with a "supporting person" at year end each of you must claim any Ontario Home Ownership Savings Plan Tax Credits separately, but one of you must claim the Property and Sales Tax Credits for both of you.

1. **Calculation of Income**
   - Net Income is the amount shown on line 236 of the return. If Net Income appears as a negative amount, enter nil on line 1.
   - If, on December 31, 1989, you resided together with your spouse, enter your spouse's Net Income on line 2.
   - If at the end of the year you were living with (but not married to) the other parent of a child you are claiming for the Sales Tax Credit, the other parent is a supporting person. This applies even if the other parent is not claiming a dependent child credit for the child. In addition, any person (other than yourself or your spouse with whom you resided on December 31, 1989) who is claiming a dependent child credit for that child is considered a supporting person.
   - Net Income of a spouse or supporting person who is 65 years of age or older must be included even if a Property Tax Grant and/or Sales Tax Grant is received by that person.

2. **Property Tax Credit**

(a) The Property Tax Credit may be claimed by all individuals resident in Ontario on December 31, 1989 except:
- persons under age 16
- persons under age 19 who live at home and are claimed as dependants for income tax purposes
- persons eligible for an Ontario Property Tax Grant
- persons with spouses eligible for an Ontario Property Tax Grant; except in the year of marriage or separation when the spouse not eligible for an Ontario Property Tax Grant may claim a Property Tax Credit based on Occupancy Cost incurred by him/her prior to marriage or after separation provided that such occupancy costs are not included in the Occupancy Cost of the other spouse for a Property Tax Grant.
- estates of deceased persons

(b) Receipts for 1989 rent or property tax payments are not required to be filed with this form but must be retained for examination on request.

(c) **Principal Residence**
- means the housing unit in Ontario which was ordinarily occupied or inhabited during 1989.
- may include hotel rooms, mobile homes or rooming houses.
- does not include a property tax exempt residence, eg. military base, home on Indian Reservation.
- does not include a nursing home or certain institutions if the residents' costs are subsidized.

An individual who moves within Ontario during the year may claim each consecutive residence based on the actual period of occupancy.

(d) **Occupancy Cost**
- for homeowners is the property tax paid on a principal residence in the taxation year, but does not include mortgage principal or interest payments.
- for tenants is 20% of the rent paid for the principal residence in the taxation year (excluding any amount paid for meals), or if both property tax and rent are paid on the same principal residence, is 20% of the total of property tax and rent paid. In this instance the total of the property tax and rent paid must be entered on line 555.
- for farmers is that portion of property tax or rent paid in respect of the principal residence plus one acre of land. The balance of the farm land, including any outbuildings, is not eligible for the Property Tax Credit, but may qualify for a Farm Tax Rebate from the Ontario Ministry of Agriculture and Food.
- must not include tax or rent paid on a second residence (eg. cottage), part of a home used for rental or business purposes, or any amount paid to family members which is not included in their income for tax purposes.

2(d) continued
- must be prorated to cover the actual period of occupancy if the principal residence was occupied for less than the full year.
- in the year of marriage is the total rent or property tax paid during the year by each person.
- in the year of separation, is the total rent or property tax paid by you following separation, plus an agreed upon share of the rent or property tax for the part of the year prior to separation

(e) **Joint Occupancy**

Where two or more persons (other than an individual with his/her spouse, or supporting person) share a principal residence, Occupancy Cost must be allocated.
- according to the beneficial ownership of each person in the housing unit, or
- according to the rent paid by each tenant.

(f) **College Residence**

Most residences of Ontario universities, colleges and schools of nursing have a deemed Occupancy Cost of $25.00. Anyone living in one of these residences is restricted to a $25.00 Occupancy Cost for the part of the year he/she lived in such a residence. Call the Information Centre to find out if your residence is included in this category.

3. **Sales Tax Credit**

All individuals resident in Ontario on December 31, 1989 may claim the Sales Tax Credit except:
- persons under age 16
- persons claimed for a Sales Tax Credit by another resident in Ontario
- persons eligible for a Sales Tax Grant
- estates of deceased persons
- persons 16 to 18 years of age claimed as dependants and living with the claimant

4. **Ontario Home Ownership Savings Plan Tax Credit**

(a) The Ontario Home Ownership Savings Plan (OHOSP) Tax Credit may be claimed by an individual resident in Ontario on December 31, 1989, who made a qualifying contribution(s) in 1989 to an OHOSP, and/or whose spouse (with whom the individual resided at the end of 1989) made a qualifying contribution(s) in 1989 to an OHOSP, except:
   (i) the OHOSP Tax Credit must be claimed by only one spouse on behalf of both spouses (if both spouses resided together at the end of 1989). Either spouse may make this claim even if only one spouse had an OHOSP.
   (ii) no OHOSP Tax Credit may be claimed if the individual ever owned an eligible home, except a home referred to in (c).
   (iii) no OHOSP Tax Credit may be claimed for contributions made to a plan that has since been terminated without the purchase of an eligible home.

(b) A supporting person must claim his/her OHOSP Tax Credit on a separate T1C(ONT.) form even though his/her income is included with that of another planholder.

(c) If you purchased an eligible home in 1989, you may still claim an OHOSP Tax Credit, provided that the qualifying contribution was made prior to the purchase.

(d) You may only claim OHOSP Tax Credits on qualifying contributions made during the first five taxation years of the life of your OHOSP.

(e) You must complete and sign the certificate on all of your T1C - OHOSP receipts for qualifying contributions made in 1989. Failure to do so will result in the rejection of your claim.

## ONTARIO TAX CREDITS

**T1C (ONT.)**
T1 SPECIAL

Basic guidelines for claiming Ontario Tax Credits appear on the reverse side of this form. The Ontario Ministry of Revenue administers a separate grant program for persons 65 years of age and older. Persons eligible to claim these grants are not entitled to claim the Property or Sales Tax Credits.

If you are claiming a credit for contributions made to an Ontario Home Ownership Savings Plan (OHOSP) you must complete the T1C (Ont.) form which includes a calculation for OHOSP tax credits. A copy of the T1C (Ont.) is included in the T1 General Tax Return which can be obtained at your nearest Revenue Canada Taxation District Office or at any office of Canada Post. If you are claiming an OHOSP credit you must also complete a T1 General Return rather than a T1 Special Return.

I hereby certify that the Net Income reported on line 2 or line 3 in the Calculation of Income for Ontario Tax Credits above is my true and correct Net Income for the year.

## Basic Guidelines for Claiming Ontario Tax Credits

- You must file a completed Individual Income Tax Return along with the Ontario Tax Credit form.
- If you lived with your spouse or a "supporting person" at year end, one of you must claim the Property and Sales Tax Credits for both of you. However, the Political Contribution Tax Credit can be claimed by either spouse.

**1. CALCULATION OF INCOME**

- Net Income is the amount shown on line 236 of the return. If Net Income appears as a negative amount, enter nil on line 1.
- If, on December 31, 1989, you resided together with your spouse, enter your spouse's Net Income on line 2.
- If at the end of the year you were living with (but not married to) the other parent of a child you are claiming for the Sales Tax Credit, the other parent is a supporting person. This applies even if the other parent is not claiming a dependent child credit for the child. In addition, any person (other than yourself or your spouse with whom you resided on December 31, 1989) who is claiming a dependent child credit for that child is considered a supporting person.
- Net Income of a spouse or supporting person who is 65 years of age or older must be included even if a Property Tax Grant and/or Sales Tax Grant is received by that person.

**2. PROPERTY TAX CREDIT**

(a) The Property Tax Credit may be claimed by all individuals resident in Ontario on December 31, 1989 except:

- persons under age 16
- persons under age 19 who live at home and are claimed as dependants for income tax purposes
- persons eligible for an Ontario Property Tax Grant
- persons with spouses eligible for an Ontario Property Tax Grant; except in the year of marriage or separation when the spouse not eligible for an Ontario Property Tax Grant may claim a Property Tax Credit based on Occupancy Cost incurred by him/her prior to marriage or after separation provided that such occupancy costs are not included in the Occupancy Cost of the other spouse for a Property Tax Grant
- estates of deceased persons.

(b) Receipts for 1989 rent or property tax payments are not required to be filed with this form but must be retained for examination on request.

(c) **Principal Residence**

- means the housing unit in Ontario which was ordinarily occupied or inhabited during 1989.
- may include hotel rooms, mobile homes or rooming houses.
- does not include a property tax exempt residence, eg. military base, home on Indian Reservation.
- does not include a nursing home or certain institutions if the residents' costs are subsidized.

An individual who moves within Ontario during the year may claim each consecutive residence based on the actual period of occupancy.

(d) **Occupancy Cost**

- for homeowners is the property tax paid on a principal residence in the taxation year, but does not include mortgage principal or interest payments.
- for tenants is 20% of the rent paid for the principal residence in the taxation year (excluding any amount paid for meals), or if both property tax and rent are paid on the same principal residence, is 20% of the total of property tax and rent paid. In this instance the total of the property tax and rent paid must be entered on line 555.
- for farmers is that portion of property tax or rent paid in respect of the principal residence plus one acre of land. The balance of the farm land, including any outbuildings, is not eligible for the Property Tax Credit, but may qualify for a Farm Tax Rebate from the Ontario Ministry of Agriculture and Food.
- must not include tax or rent paid on a second residence (eg. cottage), part of a home used for rental or business purposes, or any amount paid to family members which is not included in their income for tax purposes.
- must be prorated to cover the actual period of occupancy if the principal residence was occupied for less than the full year.
- in the year of marriage is the total rent or property tax paid during the year by each person.
- in the year of separation, is the total rent or property tax paid by you following separation, plus an agreed upon share of the rent or property tax for the part of the year prior to separation.

(e) **Joint Occupancy**

Where two or more persons (other than an individual with his/her spouse, or supporting person) share a principal residence, Occupancy Cost must be allocated:

- according to the beneficial ownership of each person in the housing unit, or
- according to the rent paid by each tenant.

(f) **College Residence**

Most residences of Ontario universities, colleges and schools of nursing have a deemed Occupancy Cost of $25.00. Anyone living in one of these residences is restricted to a $25.00 Occupancy Cost for the part of the year he/she lived in such a residence. Call the Information Centre to find out if your residence is included in this category.

**3. SALES TAX CREDIT**

All individuals resident in Ontario on December 31, 1989 may claim the Sales Tax Credit except:

- persons under age 16
- persons claimed for a Sales Tax Credit by another resident in Ontario
- persons eligible for a Sales Tax Grant
- estates of deceased persons
- persons 16 to 18 years of age claimed as dependants and living with the claimant.

### Declaration (If Property Tax Credit claimed)

I hereby declare that the address(es) of my principal residence(s) in Ontario during the 1989 taxation year was (were):

| Address(es) of Principal Residence(s) | | Number of Months Resident in 1989 | Rent/Property Tax Paid in 1989 | Name of Landlord/Municipality |
|---|---|---|---|---|
| 1 | Rent ☐ Own ☐ | | $ | |

If you had more than 2 principal residences, continue on a separate sheet. *See item 2(c).*

## CRÉDITS D'IMPÔT DE L'ONTARIO

T1C (ONT.)
T1 SPÉCIALE

Les règles de base relatives aux crédits d'impôt de l'Ontario figurent au verso de la présente formule. Le Ministère du Revenu de l'Ontario offre un programme distinct de subventions aux personnes de 65 ans ou plus. Les contribuables qui ont droit à ces subventions ne peuvent demander le crédit d'impôts fonciers ni le crédit de taxe sur les ventes.

Si vous demandez un crédit pour des contributions à un régime d'épargne-logement de l'Ontario (RÉLO), vous devez remplir la formule T1C(Ont.), qui sert à calculer les crédits d'impôts de RÉLO. La déclaration de revenus T1 Générale renferme un exemplaire de la T1C(Ont.); cette déclaration peut être obtenue d'un bureau de district de Revenu Canada, Impôt ou de tout bureau de la Société canadienne des Postes. Si vous demandez un crédit d'impôt de RÉLO, vous devez aussi remplir la déclaration T1 Générale plutôt que la T1 Spéciale.

J'atteste par les présentes que le revenu net indiqué à la ligne 2 ou à la ligne 3 ci-dessus, selon le cas, pour le calcul du revenu aux fins des crédits d'impôt de l'Ontario est le montant exact de mon revenu net pour l'année.

## Règles de base relatives aux crédits d'impôt de l'Ontario

- Pour vous prévaloir des crédits d'impôt de l'Ontario, vous devez produire une déclaration de revenus des particuliers, dûment remplie, avec la formule «Crédits d'impôt de l'Ontario».
- Si vous viviez avec votre conjoint à la fin de l'année, il faut que ce soit l'un de vous deux qui demandiez les crédits d'impôts fonciers et de taxe sur les ventes de l'Ontario pour les deux. Toutefois, l'un ou l'autre conjoint peut demander le crédit d'impôt pour contributions politiques. Si vous viviez à la fin de l'année avec une personne qui est «soutien», il faut que vous fassiez chacun votre demande du crédit d'impôt de l'Ontario pour le régime d'épargne-logement, mais que ce soit l'un de vous deux qui demandiez les autres crédits d'impôts fonciers et de taxe sur les ventes de l'Ontario pour les deux.

### 1. Calcul du revenu

- Le revenu net est le montant inscrit à la ligne 236 de la déclaration. Si ce montant est négatif, inscrivez zéro à la ligne 1.
- Si vous résidiez avec votre conjoint le 31 décembre 1989, inscrivez le revenu net de votre conjoint à la ligne 2.
- Si, à la fin de l'année, vous viviez, (sans lui être marié(e)), avec le père ou la mère, suivant le cas, d'un enfant pour lequel vous demandez le crédit d'impôt de taxe sur les ventes, la personne avec qui vous viviez maritalement est considérée comme étant soutien. Cette règle vaut même si cette personne ne demande pas de crédit pour enfants à charge relativement à l'enfant. De plus, toute autre personne que vous ou votre conjoint (avec qui vous résidiez le 31 décembre 1989) qui demande un crédit pour enfants à charge relativement à l'enfant est considérée comme étant soutien.
- Le revenu net du conjoint ou du soutien qui est âgé de 65 ans ou plus doit être indiqué même lorsqu'il s'agit d'une personne qui bénéficie du programme de subventions pour les impôts fonciers et pour la taxe sur les ventes.

### 2. Crédit d'impôts fonciers

a) Le crédit d'impôts fonciers peut être demandé par tous les particuliers qui résidaient en Ontario le 31 décembre 1989, ***sauf:***
- les personnes de moins de 16 ans
- les personnes de moins de 19 ans qui habitent à la maison et qui sont déclarées à charge aux fins de l'impôt
- les personnes qui ont droit à une subvention de l'Ontario pour impôts fonciers
- les personnes dont le conjoint a droit à une subvention de l'Ontario pour impôts fonciers, sauf si le mariage a eu lieu pendant l'année ou s'il y a eu séparation pendant l'année, le conjoint qui n'a pas droit à une subvention de l'Ontario pour impôts fonciers peut demander un crédit d'impôts fonciers fondé sur son coût d'habitation avant le mariage ou après la séparation, à condition que ce coût d'habitation ne soit pas inclus dans la demande de subvention pour impôts fonciers de l'autre conjoint
- les successions de personnes décédées

b) Il n'est pas nécessaire de joindre à la formule T1C(ONT.) les reçus pour le loyer ou les impôts fonciers versés en 1989, mais il faut les conserver pour pouvoir les produire sur demande.

c) **Résidence principale**
- désigne le logement, en Ontario, habituellement habité en 1989
- peut désigner une chambre d'hôtel, une maison mobile ou une pension
- ne comprend pas une résidence exempte d'impôts fonciers, par exemple une base militaire et une maison située dans une réserve indienne
- ne comprend pas une maison de santé si les frais supportés par les pensionnaires sont subventionnés, ni certains établissements.

Un résidant de l'Ontario qui déménage au cours de l'année sans quitter la province peut demander pour chaque résidence consécutive le crédit pour la période réelle d'habitation.

d) **Coût d'habitation**
- pour les propriétaires, les impôts fonciers versés pour une résidence principale pendant l'année d'imposition (sauf les paiements de capital et d'intérêts sur hypothèque).

2 d) suite
- pour les locataires, 20% du loyer versé pour la résidence principale pendant l'année d'imposition (sauf le coût des repas), ***ou*** lorsque des impôts fonciers et un loyer sont versés pour une même résidence principale, 20% du total des impôts fonciers et du loyer versés. Dans ce cas, le total doit être inscrit à la ligne 555.
- pour les agriculteurs, la partie du loyer ou des impôts fonciers qui a été versée pour la résidence principale et un acre de terrain. Le reste du fonds de terre agricole, y compris les dépendances, ne donne pas droit au crédit d'impôts fonciers, mais il peut donner droit à un dégrèvement d'impôt pour les agriculteurs du ministère de l'Agriculture et de l'Alimentation de l'Ontario.
- le loyer ou les impôts fonciers versés pour une résidence secondaire (par exemple, un chalet) ou pour la partie d'une maison qui est louée ou qui est utilisée à des fins commerciales ne doivent pas être comptés, ni les sommes payées aux membres de la famille qui ne sont pas incluses dans leur revenu aux fins de l'impôt
- si la résidence principale n'a pas été habitée toute l'année, le coût d'habitation doit être réduit en proportion de la période d'habitation.
- si le mariage a eu lieu au cours de l'année, le coût d'habitation est le total du loyer ou des impôts fonciers versés pendant l'année par chaque personne.
- s'il y a eu séparation au cours de l'année, le coût d'habitation est le total du loyer ou des impôts fonciers versés par vous après la séparation, plus votre part convenue du loyer ou des impôts fonciers versés pour la partie de l'année précédant la séparation.

e) **Cohabitation**

Lorsque deux particuliers (autres qu'une personne et son conjoint ou une personne qui est "soutien") ou plus partagent une résidence principale, le coût d'habitation doit être attribué:
- selon le degré de propriété réelle de chaque personne dans le logement ou
- selon le loyer payé par chaque locataire.

f) **Résidence d'étudiants**

Le coût d'habitation pour la plupart des résidences d'universités, de collèges et d'écoles de sciences infirmières en Ontario est fixé à 25 $. Quiconque habite une résidence de ce genre dont le coût d'habitation a été fixé à l'avance n'a droit qu'au montant ci-dessus pour la période de l'année où il a habité une telle résidence. Pour savoir si le coût d'habitation de votre résidence a été fixé comme il est indiqué ci-dessus, adressez-vous au Centre d'information.

### 3. Crédit de taxe sur les ventes

Ce crédit peut être demandé par tous les particuliers qui résidaient en Ontario le 31 décembre 1989, ***sauf:***
- les personnes de moins de 16 ans
- les personnes déclarées pour un crédit de taxe sur les ventes par un autre résidant de l'Ontario
- les personnes qui ont droit à une subvention pour taxe sur les ventes
- les successions de personnes décédées
- les personnes âgées de 16 à 18 ans qui sont déclarées à charge et qui habitent avec la personne qui demande le crédit

**Attestation**

J'atteste que les renseignements donnés ci-dessus sont exacts et, si je demande le crédit d'impôts fonciers et le crédit de taxe sur les ventes, que je n'avais pas droit aux subventions pour impôts fonciers et taxe sur les ventes de l'Ontario le 31 décembre 1989.

## Règles de base relatives aux crédits d'impôt de l'Ontario

- Pour vous prévaloir des crédits d'impôt de l'Ontario, vous devez produire une déclaration de revenus des particuliers, dûment remplie, avec la formule «Crédits d'impôt de l'Ontario».
- Si vous viviez avec votre conjoint à la fin de l'année, il faut que ce soit l'un de vous deux qui demandiez les crédits d'impôts fonciers et de taxe sur les ventes de l'Ontario pour les deux. Toutefois, l'un ou l'autre conjoint peut demander le crédit d'impôt pour contributions politiques. Si vous viviez à la fin de l'année avec une personne qui est «soutien», il faut que vous fassiez chacun votre demande du crédit d'impôt de l'Ontario pour le régime d'épargne-logement, mais que ce soit l'un de vous deux qui demandiez les autres crédits d'impôts fonciers et de taxe sur les ventes de l'Ontario pour les deux.

1. **Calcul du revenu**
   - Le revenu net est le montant inscrit à la ligne 236 de la déclaration. Si ce montant est négatif, inscrivez zéro à la ligne 1.
   - Si vous résidiez avec votre conjoint le 31 décembre 1989, inscrivez le revenu net de votre conjoint à la ligne 2.
   - Si, à la fin de l'année, vous viviez, (sans lui être marié(e)), avec le père ou la mère, suivant le cas, d'un enfant pour lequel vous demandez le crédit d'impôt de taxe sur les ventes, la personne avec qui vous viviez maritalement est considérée comme étant soutien. Cette règle vaut même si cette personne ne demande pas de crédit pour enfants à charge relativement à l'enfant. De plus, toute autre personne que vous ou votre conjoint (avec qui vous résidiez le 31 décembre 1989) qui demande un crédit pour enfants à charge relativement à l'enfant est considérée comme étant soutien.
   - Le revenu net du conjoint ou du soutien qui est âgé de 65 ans ou plus doit être indiqué même lorsqu'il s'agit d'une personne qui bénéficie du programme de subventions pour les impôts fonciers et pour la taxe sur les ventes.

2. **Crédit d'impôts fonciers**

a) Le crédit d'impôts fonciers peut être demandé par tous les particuliers qui résidaient en Ontario le 31 décembre 1989, ***sauf:***
   - les personnes de moins de 16 ans
   - les personnes de moins de 19 ans qui habitent à la maison et qui sont déclarées à charge aux fins de l'impôt
   - les personnes qui ont droit à une subvention de l'Ontario pour impôts fonciers
   - les personnes dont le conjoint a droit à une subvention de l'Ontario pour impôts fonciers, sauf si le mariage a eu lieu pendant l'année ou s'il y a eu séparation pendant l'année, le conjoint qui n'a pas droit à une subvention de l'Ontario pour impôts fonciers peut demander un crédit d'impôts fonciers fondé sur son coût d'habitation avant le mariage ou après la séparation, à condition que ce coût d'habitation ne soit pas inclus dans la demande de subvention pour impôts fonciers de l'autre conjoint
   - les successions de personnes décédées

b) Il n'est pas nécessaire de joindre à la formule T1C(ONT.) les reçus pour le loyer ou les impôts fonciers versés en 1989, mais il faut les conserver pour pouvoir les produire sur demande.

c) **Résidence principale**
   - désigne le logement, en Ontario, habituellement habité en 1989
   - peut désigner une chambre d'hôtel, une maison mobile ou une pension
   - ne comprend pas une résidence exempte d'impôts fonciers, par exemple une base militaire et une maison située dans une réserve indienne
   - ne comprend pas une maison de santé si les frais supportés par les pensionnaires sont subventionnés, ni certains établissements.

   Un résidant de l'Ontario qui déménage au cours de l'année sans quitter la province peut demander pour chaque résidence consécutive le crédit pour la période réelle d'habitation.

d) **Coût d'habitation**
   - pour les propriétaires, les impôts fonciers versés pour une résidence principale pendant l'année d'imposition (sauf les paiements de capital et d'intérêts sur hypothèque).
   - pour les locataires, 20% du loyer versé pour la résidence principale pendant l'année d'imposition (sauf le coût des repas), ***ou*** lorsque des impôts fonciers et un loyer sont versés pour une même résidence principale, 20% du total des impôts fonciers et du loyer versés. Dans ce cas, le total doit être inscrit à la ligne 555.
   - pour les agriculteurs, la partie du loyer ou des impôts fonciers qui a été versée pour la résidence principale et un acre de terrain. Le reste du fonds de terre agricole, y compris les dépendances, ne donne pas droit au crédit d'impôts fonciers, mais il peut donner droit à un dégrèvement d'impôt pour les agriculteurs du ministère de l'Agriculture et de l'Alimentation de l'Ontario.
   - le loyer ou les impôts fonciers versés pour une résidence secondaire (p. ex., un chalet) ou pour la partie d'une maison qui est louée ou qui est utilisée à des fins commerciales ne doivent pas être comptés, ni les sommes payées aux membres de la famille qui ne sont pas incluses dans leur revenu aux fins de l'impôt

2 d) suite
   - si la résidence principale n'a pas été habitée toute l'année, le coût d'habitation doit être réduit en proportion de la période d'habitation.
   - si le mariage a eu lieu au cours de l'année, le coût d'habitation est le total du loyer ou des impôts fonciers versés pendant l'année par chaque personne.
   - s'il y a eu séparation au cours de l'année, le coût d'habitation est le total du loyer ou des impôts fonciers versés par vous après la séparation, plus votre part convenue du loyer ou des impôts fonciers versés pour la partie de l'année précédant la séparation.

e) **Cohabitation**

Lorsque deux particuliers (autres qu'une personne et son conjoint ou une personne qui est "soutien") ou plus partagent une résidence principale, le coût d'habitation doit être attribué:
   - selon le degré de propriété réelle de chaque personne dans le logement ou
   - selon le loyer payé par chaque locataire.

f) **Résidence d'étudiants**

Le coût d'habitation pour la plupart des résidences d'universités, de collèges et d'écoles de sciences infirmières en Ontario est fixé à 25 $. Quiconque habite une résidence de ce genre dont le coût d'habitation a été fixé à l'avance n'a droit qu'au montant ci-dessus pour la période de l'année où il a habité une telle résidence. Pour savoir si le coût d'habitation de votre résidence a été fixé comme il est indiqué ci-dessus, adressez-vous au Centre d'information.

3. **Crédit de taxe sur les ventes**

Ce crédit peut être demandé par tous les particuliers qui résidaient en Ontario le 31 décembre 1989, ***sauf:***
   - les personnes de moins de 16 ans
   - les personnes déclarées pour un crédit de taxe sur les ventes par un autre résidant de l'Ontario
   - les personnes qui ont droit à une subvention pour taxe sur les ventes
   - les successions de personnes décédées
   - les personnes âgées de 16 à 18 ans qui sont déclarées à charge et qui habitent avec la personne qui demande le crédit

4. **Crédit d'impôt de l'Ontario pour le régime d'épargne-logement**

a) Le crédit d'impôt de l'Ontario pour le régime d'épargne-logement (RÉLO) peut être demandé par les particuliers résidant en Ontario le 31 décembre 1989 qui ont fait des contributions admissibles à un régime d'épargne-logement de l'Ontario en 1989 et/ou dont le conjoint (avec qui il résidait à la fin de 1989) a fait des contributions admissibles à un RÉLO en 1989, sous réserve des conditions suivantes:
   (i) dans le cas d'un couple, la demande de crédit doit être faite pour les deux conjoints (s'ils cohabitaient à la fin de 1989) par l'un ou l'autre d'entre eux. L'un ou l'autre conjoint peut faire la demande de crédit, même si un seul a un RÉLO.
   (ii) un crédit d'impôt de RÉLO ne peut pas être demandé si le particulier a déjà été propriétaire d'une maison admissible, sauf dans le cas mentionné au point c) ci-dessous.
   (iii) un crédit d'impôt de RÉLO ne peut pas être demandé pour des contributions faites à un régime qui a maintenant pris fin sans qu'il y ait eu achat d'une maison admissible.

b) Une personne qui est un soutien doit faire sa demande de crédit d'impôt de RÉLO au moyen d'une formule T1C(ONT.) distincte, même si son revenu est inclus dans celui d'un autre détenteur de régime.

c) Si vous avez acheté une maison admissible en 1989, vous pouvez demander un crédit d'impôt de RÉLO si les contributions admissibles ont été faites avant l'achat.

d) Vous pouvez demander un crédit d'impôt de RÉLO seulement pour les contributions admissibles faites au cours des cinq premières années d'imposition de la durée de votre RÉLO.

e) Vous devez remplir et signer le certificat de tous vos reçus T1C-OHOSP de contributions admissibles faites en 1989, à défaut de quoi votre demande de crédit sera rejetée.
